

Threads of EMPOWERMENT

Conflict Textiles' International Journey

Through textile, people around the world have communicated their experiences in relation to violence and conflict, human rights violations, poverty, oppression and environmental issues.

The result is a form of artistic expression and a visual record of personal, and often very poignant, testimonies.

These collaborative exhibitions demonstrate the strengths and highlights of the Conflict Textiles collection, its history, its international diversity and the important themes it addresses.

You can find out more about the Conflict Textiles collection and associated activities here:

Threads of EMPOWERMENT
